

Akash Kumar

AI/ML Engineer | Automation Systems | Fintech Applications
Kolkata, India | akashsingh4152@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

AI/ML engineer with production experience in LLM evaluation pipelines and end-to-end ML systems. Built a market regime classifier with 45+ GitHub stars and a Hugging Face dataset with 300+ downloads.

Education

- **Master of Computer Applications**, Techno Main Salt Lake, Kolkata | CGPA: 8 2024-2026
- **Bachelor of Computer Applications**, Amity University Patna | CGPA: 8.45 2021- 2024

Experience

LLM Post-Training Intern Mar 2026 – Jun 2026

Ethara AI (Green Rider Technology LLP)

Remote

- Evaluated LLM outputs across reasoning, factual consistency, instruction-following, and alignment dimensions.
- Worked on post-training workflows involving SFT and RLHF evaluation pipelines.
- Identified hallucination, inconsistency, and reasoning failure patterns during model evaluation..
- Contributed to prompt refinement and dataset curation for improving model behaviour.

Skills

Languages: Python, JavaScript, C++

AI/ML: Scikit-learn, HMM, Hugging Face, Feature Engineering, RLHF, Technical Indicators

Frameworks: FastAPI, Streamlit, React, React Native, Express.js

Cloud & Data: AWS (S3, Glue, Redshift), MongoDB, SQL, ETL Pipelines

Tools: Git, Linux/Bash, Firebase, REST APIs

Projects

Shelly – Business Automation Platform for Lead Generation & Outreach | [\[GitHub\]](#) 2026

- Automated **Google Maps scraping** → **website extraction** → **email discovery** → **CSV normalization**.
- Built bulk email sender with rate-limiting and retry logic to avoid spam flags.
- Built workflow dashboard for lead management, outreach tracking, and delivery monitoring.
- Reduced manual lead collection time by **~90%**; used to send **100+ targeted emails/day**.

CryptoMarket Regime Classifier – ML pipeline for adaptive trading | [\[GitHub\]](#) 2025

- Designed an end-to-end ML pipeline to classify market regimes from multi-timeframe crypto data (5m-1h), enabling adaptive trading strategies - GitHub project with **45+ stars**.
- Processed **2M+ market data points**; identified **6 distinct regimes** including Trend, Range, Squeeze, and High Volatility states.
- Published training dataset on Hugging Face (**300+ downloads**); 6-state HMM trained on 315K BTC observations, deployed via Streamlit dashboard.
- Modular models + scalars for integration into strategy design, position sizing and risk management.

Zenin - React Native mobile app for personal finance tracking | [\[GitHub\]](#) 2025

- Parsed 500+ SMS/month via **Headless JS**; added manual offline cash entry.
- Integrated **Firebase Auth & Firestore** for real-time sync across devices (~100ms average response time).
- Added **biometric login & auto-categorization logic**; improved user onboarding time by ~30%.
- Designed offline-first architecture enabling **~80% app functionality** without internet connectivity.

Certifications

- AWS Cloud Foundations | Amazon Web Services (AWS) Mar 2025
- AWS Data Engineering | Amazon Web Services (AWS) Mar 2025
